NATURAL PLANT
BASED VITAMIN
ENRICHED CREAM
FOR THE SKIN

WHAT IS DERMAKA CREAM?

SOOTHE AND HEAL SKIN NATURALLY!

Dermaka cream is made of natural plant extracts with added vitamins essential for skin health. Minimizes redness, bruising and staining after aesthetic or surgical procedures!

Dermaka was first developed by Ronald Bush, MD, FACS and Peggy Bush, APRN, for

bruising and redness that occurs after surgical procedures. It soon became evident that many conditions that affect the skin could be treated with dermaka cream. Patients use dermaka for a wide variety of conditions including bruising, rashes, dry skin, muscle and joint pain.

Developed by

Ronald Bush, MD, FACS & Peggy Bush, APRN

INGREDIENTS

ARNICA MONTANA

- Known for years to be both an anti-inflammatory and to decrease bruising
- Contains lactones, which in the herbal format contribute to the anti-inflammatory effect
- Lactones prevent production of inflammatory substances such as Nuclear Factor Kappa Beta
- Histological studies have shown early resolution of bruising by absence of red cells in the reticular dermis

BROMELAIN

- Enzyme found in pineapple juice and the stem
- It is used to reduce swelling and inflammatory processes after surgery
- It works synergistically with Arnica

LICORICE EXTRACT (GLYCYRRHIZA GLABRA)

- Nature's most potent whitening agent
- Contains Glabridin which is an active ingredient containing 5 flavonoids that act to depigment or lighten the skin while blocking the enzyme tyrosinase that causes damaged skin to darken

CHAMOMILE EXTRACT (CHAMONILLA RECUTITA)

- Anti-Inflammatory and antiseptic properties

GREEN TEA EXTRACT (CAMELLIA SINENSIS)

- Powerful antioxidant
- Anti-inflammatory
- Stimulates skin microcirculation
- Numerous peer reviewed studies attest to its effectiveness

VITAMIN A (RETINOL)

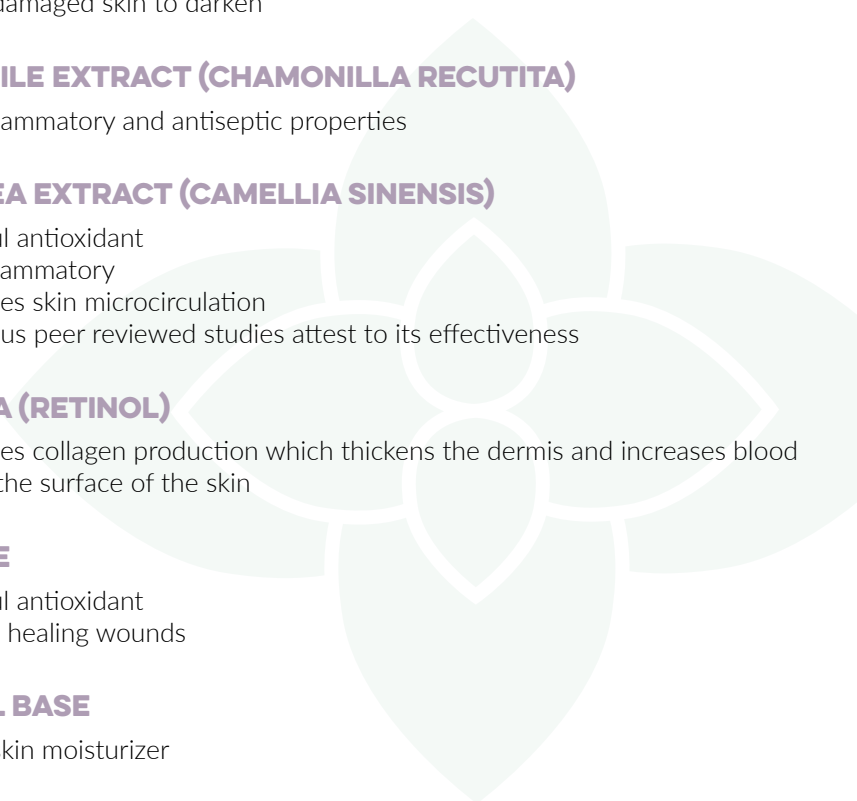

- Stimulates collagen production which thickens the dermis and increases blood flow to the surface of the skin

VITAMIN E

- Powerful antioxidant
- Helps in healing wounds

OLIVE OIL BASE

- Potent skin moisturizer

ABOUT DERMAKA

- Ingredients are all natural and inert
- Well tolerated by most people
- Dermatology tested and approved in one of the largest dermatology centers in the United States
- Extensive clinical testing has shown marked reduction in bruising and inflammation
- Clinical and histological studies are ongoing for the treatment of solar elastosis
- Developed by a surgeon
- Made in an FDA approved facility in the USA

DIRECTIONS

- Apply 2- 3 times a day and massage into area for 15 seconds or as instructed by physician
- Dermaka cream can be applied by the nurse post treatment or surgical procedure
- Apply in the evenings starting 5 days prior to cosmetic procedure
